- Sprung hardwood floor
- Flexible seating for approximately 150
- Has a control room above

Miscellaneous Information Studio Theatre:

The Studio Theatre has black drapes on a track around the perimeter of the room. The floor is made from Brazilian Cherry wood. Please treat it well. This is a flexible space room; please consult the Technical Director or House Manager about your specific show needs. As this room has a dead hung grid any lighting required must be done in advance while the room is clear. This is necessary because access to the grid is done via a Genie Lift which needs space to move around. These kinds of considerations may influence your setup time in this room. Many different looks and moods are achievable with proper lighting, decor and planning.

This theatre shares the loading dock and backstage facilities with the main stage. Care will be taken by staff to plan the usage of these areas when both venues are used at once.

Maple Ridge Arts Centre Facility Technical Specifications “Lighting System”

Dimming: (note only 400 of the possible 480 dimmers exist)

Main Stage 384 dimmers @ 2.4 k each (Strand CD80 Supervisor)

Maple Ridge Arts Centre Facility Technical Specifications “Bar and Catering” Food, Drink and Catering Services:

A full range of services for your event are available in house or through our suppliers. Please consult our House Manager to arrange the specific needs for your event at 604.476.2783

Parking is available on the street or in the underground parking at Maple Ridge Town Centre. Access to the underground *pay-parking* lot is available from 224th street, Dewdney Trunk Road or Edge Street. Additional parking is available in the pay lot on Edge Street as well. Please note that the ACT holds the parking gates open past 10pm on performance nights only. Anyone parked underground on non performance nights past 10pm is responsible to get their vehicles out on time. The Arts Centre does not have any control on the parking gates. Parking is not available in our loading dock. Only vehicles needing to load or unload may park there.

Time in the building:

Your contracted time in the ACT facilities is noted on your contract. Please remember that any setup and technical rehearsals etc. are part of your contracted time. No setup will take place prior to your arrival unless specifically arranged in advance. The clock starts when the first person arrives to when the stage is clean and the last person from your event has left the facility. Additional charges will apply for anytime beyond the contract. We do our best to make the most valuable use of your time while in the ACT. Please ask to see our operational procedures for all details related to bookings. This will help you prepare for your event.

Other important information:

Food and drinks are not permitted onstage, in the house or control rooms. Bottled water only is permitted. During setup and rehearsal use of the house and lobby areas is not permitted unless specifically arranged in advance. For larger groups of people technical staff may appoint 1 or 2 people as a fire safety and evacuation officer. This person(s) will be responsible to assist technical staff in the event the need to evacuate the building occurs. In any case the gazebo at the front of the Arts Centre is the meeting place for all cast and crew after an evacuation of the building. Various theatre staff are trained for first aid and kits are available. Please inform staff if first aid services are required at any time.

To call 911 from phones within the ACT **9911 must be dialed!**
